

A scatter plot showing the relationship between 'Uncertainties' (x-axis) and an unlabeled y-axis. The x-axis ranges from 0.10 to 0.35, and the y-axis ranges from 0.10 to 0.40. The plot contains numerous blue circular data points and a solid red regression line. The data points are widely scattered around the regression line, which shows a positive linear trend. A legend in the top-left corner identifies the blue dots as 'Data' and the red line as 'Regression Line'.
